

One to One Africa

Professional Nurse 2

Location: Mthatha, Eastern Cape

Successful applicant is expected to be available to start in mid-February or 1st March 2024.

One to One Africa is the South African-registered non-profit organization that works to transform the lives of families, especially children, women, and young people affected by poverty and chronic illness, including HIV. One to One Africa seeks to address core gaps in healthcare, education and psychosocial support in neglected and under-served communities to ensure that families survive and thrive.

One to One Africa seeks to appoint a Professional Nurse for its Mobile Clinic. The Mobile Clinic Nurse plays a pivotal role in the successful operation and delivery of healthcare services to underserved communities. This position involves supporting all clinical aspects of the mobile clinic's activities, ensuring quality care, and maintaining efficient clinic operations. This position requires a dedicated and compassionate individual to join the clinical team, engage with the community, and contribute to the overall success of the mobile clinic's mission.

Responsibilities

Clinical Management:

- Ensure adherence to clinical protocols, guidelines, and best practices in healthcare service delivery.
- Participate in the development of clinical policies and procedures.

Patient Care:

- Conduct thorough patient assessments, diagnose medical conditions, and develop treatment plans.
- Administer medications, vaccinations, and medical interventions as required.
- Ensure the delivery of patient-centered care with a focus on quality and safety.

Clinical Operations:

- Support the scheduling of mobile clinic visits, ensuring optimal coverage of target communities.
- Coordinate with support staff to manage patient flow, registration, and triage processes.
- Monitor and maintain medical supplies, equipment, and medications.

Health Education and Promotion:

- Lead health education sessions for patients and the community on various health topics.
- Foster preventive and promotive healthcare behaviors through informative sessions.

Data Management and Reporting:

- Ensure accurate and timely documentation of patient information, diagnoses, treatments, and outcomes.
- Compile and submit regular reports on clinical activities, patient statistics, and service utilization.

Quality Assurance:

- Monitor the quality of healthcare services provided, identifying areas for improvement.
- Implement quality assurance measures to ensure adherence to clinical standards.

Emergency Preparedness:

- Develop and implement protocols for handling medical emergencies and urgent situations.
- Provide leadership and support during emergency response efforts.

Community Engagement:

- Build rapport with community members, local leaders, and stakeholders to promote clinic services.
- Address community concerns and feedback to enhance service delivery and patient satisfaction.

Qualifications:

- Registered Nurse with up to date SANC registration.
- Proven clinical experience, preferably in a mobile or rural healthcare setting.
- Certification in Adult Primary Care (APC)
- Certification in NIMART
- Certification in Midwifery
- Strong clinical assessment and decision-making skills.
- Excellent communication and interpersonal abilities.
- Proficiency in electronic health records (EHR) systems and basic computer skills.
- Knowledge of primary healthcare principles, disease prevention, and health education.
- Ability to work in a dynamic and challenging environment, often in remote locations.
- Cultural sensitivity and the ability to work effectively with diverse communities.
- Valid driver's license.
